As part of the TEI Sector Assistance Strategy, NCOSS has engaged Fams to deliver workshops across NSW to provide organisations with the opportunity to examine how to develop, implement and evaluate community-based activities through using evidence and measuring outcomes.

The workshop will provide opportunities to engage in 'hands on' activities to help participants follow processes to identify the evidence base for and the impact of your activities/programs, develop outcomes and tools to measure them, and reflect on programs that are relevant to the reformed TEI funding programs and/or an outcomes measurement framework.

Learning Outcomes

- Improved knowledge of what evidence informed, outcomes focused means for your work
- Increased confidence to engage in program planning and development
- Better understanding of performance accountability and how to engage in continuous improvement of your program
- Increased awareness of the value of data and evidence in program design, delivery and reflection

Activities during the workshop include using a FACSIAR template to develop a program logic for one of the activities you currently deliver. It is assumed that participants will have a basic knowledge of Outcomes Measurement.

These workshops are being provided free of charge for TEI funded services only as part of the FACS TEI Sector Assistance Strategy. Organisations who wish to participate must be funded under the Targeted Earlier Intervention Program.

The following workshops have been scheduled:

12 April **Broken Hill**

29 April **Lithgow**

30 April **Dubbo**

3 May **Sydney**

13 May **Bathurst**

14 May **Young**
